

Venkata Sravanthi Addagada

AI / GenAI Engineer | Computer Science Graduate

vsravanthiaddagada@gmail.com | +91 9640509787 | Bengaluru, India | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Computer Science graduate (2026) with hands-on AI/ML and Generative AI exposure through an internship in semantic search, LLM fine-tuning, and evaluation, plus Archiva, an independently built RAG system. Familiar with LLMs, RAG, semantic search, agentic AI, and Python-based AI systems. Seeking an entry-level AI Engineer / GenAI Engineer / ML Engineer role.

TECHNICAL SKILLS

AI / GenAI LLMs, Generative AI, Agentic AI, MCP, Prompt Engineering, QLoRA Fine-Tuning, Hugging Face Transformers, PyTorch, LLM Evaluation & Benchmarking

RAG / Retrieval Hybrid BM25 + Dense Retrieval, Semantic Search, Reciprocal Rank Fusion, Cross-Encoder Reranking, pgvector, Sentence Transformers

Backend & Tools Python, FastAPI, PostgreSQL, gRPC, Ray Serve, MLflow, Git, GitHub

INTERNSHIP EXPERIENCE

AI / GenAI Engineering Intern | Quintesys Technologies

Jan 2026 – Aug 2026

- Built a **pgvector-backed semantic search component**: generated sentence-transformer embeddings at document- and chunk-level granularity, stored them in PostgreSQL with an ivfflat ANN index, and implemented cosine-similarity retrieval for a multi-agent pipeline.
- Extended **MCP-based AI agents** with dynamic Plotly visualization generation (bar, line, pie charts) for multi-modal agent responses combining text, tabular data, and charts.
- Fine-tuned Qwen2.5-Coder-7B-Instruct using **QLoRA** on 1,059 schema-annotated samples for PBIP-compatible visualContainer JSON generation, achieving 9/10 successful renderings on held-out evaluation — compared with **6/10 for Claude Sonnet 4.6** on the same benchmark.
- Built and deployed AI inference pipelines using **FastAPI, gRPC, and Ray Serve**, with experiment tracking and artifact versioning in MLflow.

FEATURED PROJECT

Archiva — Self-Healing Agentic RAG for Documents | [GitHub](#)

2026

Independent project

- Built an end-to-end RAG document Q&A application (FastAPI + React + PostgreSQL) with hybrid BM25 + dense retrieval, Reciprocal Rank Fusion, and cross-encoder reranking; implemented a deterministic self-healing agentic loop and validated the system with 166 automated tests and CI.

EDUCATION

Bachelor of Technology in Computer Science and Engineering

2022 – 2026

Kakinada Institute of Engineering and Technology (KIET), JNTU Kakinada | CGPA: 7.18/10

CERTIFICATIONS

- Foundations of Modern Machine Learning (FMML) — IIIT Hyderabad, 2023–2024
